PC-to-TV Video Converter

VIEW SILVER

Art. 1302

VIEW SILVER IS THE PROFESSIONAL WAY TO DISPLAY PRESENTATIONS, GAMES, MULTIMEDIA, AND THE INTERNET ON ANY TV OR PROJECTOR. AUTO-SENSING VIDEO CIRCUITRY OFFERS INSTANT COMPATIBILITY WITH WINDOWS AND MACINTOSH COMPUTERS.

TRUESCALE™ DIGITAL

Display presentations, games, the Internet, and multimedia on any TV.

View Silver is the high quality choice for PC-to-TV video conversion.

View Silver offers unparalleled picture quality and maximum flexibility to meet the needs of professionals around the globe.

By utilizing Enhancements' proprietary FS40 ASIC TrueScale™ digital video processor, View Silver will convert computer resolutions from VGA (640 x 480) to XGA (1024 x 768) and perfectly display these on your monitor, television, or projector. Built-in screen sizing and screen positioning capabilities allow you to fit images precisely onto any television without dropping lines or sacrificing picture clarity.

THE PERFECT PRESENTATION

The View Silver also offers special features for training and presentations including, compress, zoom, pan, freeze, and independent horizontal/ vertical underscan. With these features, you can easily present onto any television while greatly surpassing the quality of inferior converters or on board "video" outputs that lack the required processing power to convey clarity.

DOT YOUR I'S AND CROSS YOUR T'S

The exclusive flicker filters stabilize the video image so your slide presentations and other computer applications will look their best, without the annoyance of dropped lines that can cause small text to become unreadable and spreadsheets to become confusing. For computer based training, your program will remain clear and readable to maximize communication and effective collaboration.

CONVENIENCE TO GO

View Silver supports any Macintosh and Windows computer with a standard VGA-type output. Connection and configuration is easy and the front panel status indicators, remote control, and compact size make View Silver the perfect companion to your computer.
